

LEED Version 4 (2016)

To Whom It May Concern:

Thank you for your inquiry concerning the recycled content of our Razor Ribbon® brand barbed tape. LEED Version 4 is the current version of LEED

LEED MR Credit 2: Construction Waste Management

Unlike other materials, steel contains recycled material and is also fully recyclable. In fact, according to the Steel Recycling Institute (SRI), steel is the world's most recycled material. Therefore, scrap produced during construction is diverted from landfills.

LEED MR Credit 4: Recycled Content and Regional Materials

According to LEED requirements, mechanical, electrical and plumbing components are included in the calculations for recycled content and regional materials.

Razor Ribbon is a mechanical component, contains considerable recycled content and is fully recyclable. The following information provides details about the recycled content of our steel products.

The US Green Building Council (USGBC) has ruled that average industry values for recycled content may be used for steel products.

According to the Steel Recycling institute, the average industry values for steel are:

Post-Consumer:	25%
Pre-Consumer:	0%

MR Credit for regional materials is available within a 100 mile radius from the distribution and/or purchase location and includes all points of manufacture.

For your information, we manufacture Razor Ribbon® brand barbed tape in Hebron, OH.

LEED MR Credit: Material Ingredients Optimization

Allied steel conduit and tubing are compliant with the European Union's REACH program. REACH certifications are available upon request.
