

# RAZOR RIBBON® BTC NATO-22

Razor Ribbon® is excited to announce its latest blade profile. The NATO-22 barb sets the new standard for barbed tape applications requiring NATO compliance.

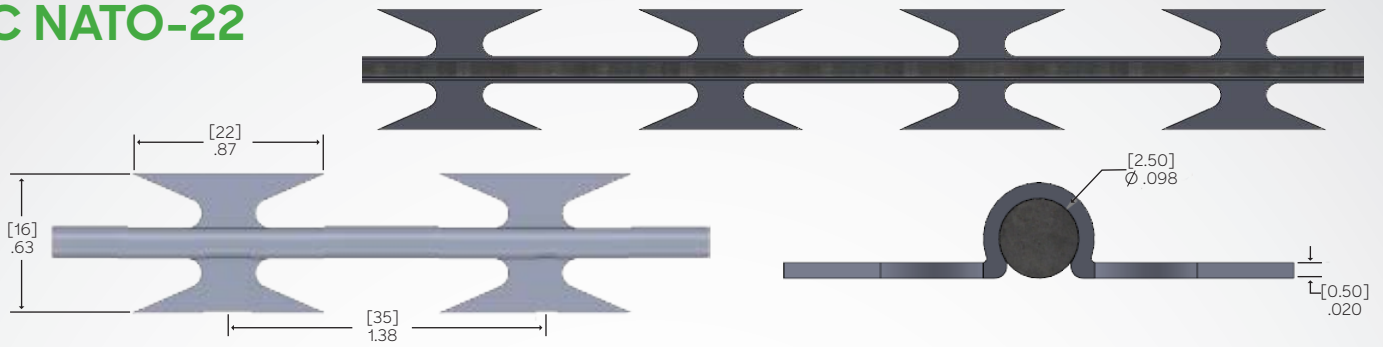

## What's Special About the New BTC NATO-22 Barb?

- Cost Effective - Developed for applications requiring NATO compliance, BTC NATO-22 exhibits a larger/wider barb than medium barb while being a more economical solution than Razor Ribbon® long barb
- Superior Performance - the NATO-22 barb is available offset, which greatly increases the coil density and the psychological deterrence. There is greater barb effectiveness due to an increased opportunity for barb penetration.
- Exceptional Quality - Like all Razor Ribbon® products, BTC NATO-22 is manufactured out of high-quality/high-strength stainless or galvanized steel
- Countless Configurations - BTC NATO-22 barbed tape comes in more standard diameter/loops/clips configurations than any other Razor Ribbon® product
- Versatile - The NATO-22 barb is available on all Razor Ribbon® products
- Made in the USA - BTC NATO-22 is proudly manufactured in the U.S.A. in Hebron, Ohio
- For more information call 800-882-5543
