DETER, DELAY, PROTECT, IN SECONDS.

The Portable Rapid Deployment Unit (a.k.a. "Atkore Instabox") is designed to create a safe and effective barrier used to deter, delay and protect against intrusion. The Portable RDU can be used in both indoor and outdoor applications dispensing up to 75' (22.8m) of barbless tape or Instabarrier® in seconds by one person.
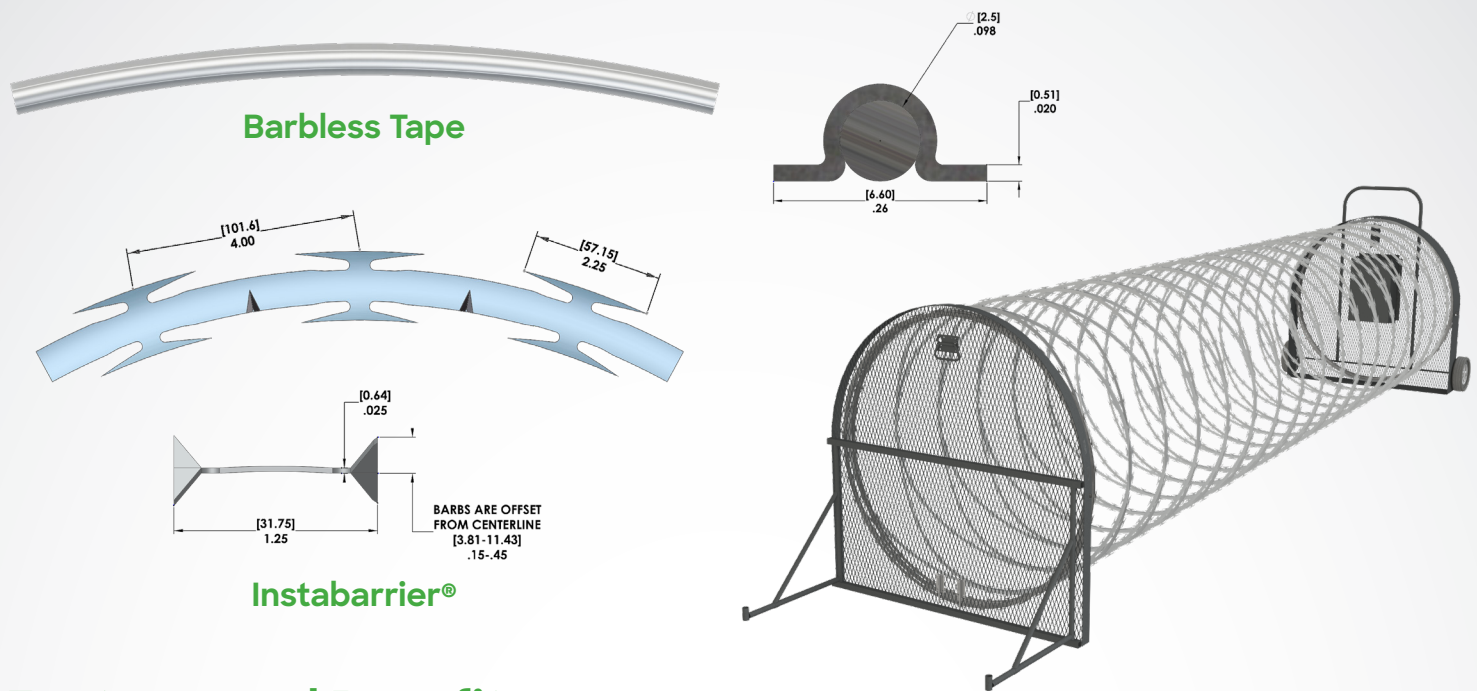

For more information, visit atkore.com/razor

Highlights

- All materials and tools necessary for deployment are stored directly in the self-contained tool box. Accessories include a hammer, protective gloves and arm guards, ground stakes, wire ties and wire tie tool.

- Barbless tape option is available and designed as a deterrence against intrusion while eliminating any danger associated with sharpness of razor wire.

- The Portable RDU features front and back covers fabricated from high quality galvanized expanded metal mesh.

Instabarrier®

Features and Benefits

- Provides rapid construction of controlled, limited, and exclusion areas
- Appropriate as a temporary barrier for emerging threats or as a permanent barrier
- Deploys up to 75 feet (22.8m) of barbless tape or Instabarrier® barbed tape in under 30 seconds by a single person
- Retracts quickly and efficiently for reuse and removes the potentially hazardous conditions associated with field installation of coils
- Rugged design features heavy duty wheels, hot-dip galvanized panels and powder coat finish make the portable RDU suitable for deployment in differing climates and terrain conditions.
- Lightweight, high strength and modular allowing multiple units to be easily tied together forming one continuous barrier
- Manufactured in Hebron, Ohio U.S.A.

Uses

Asset protection, Public venues, Retail, Crowd control, Sidewalks, Streets, Gates, Embassies and Government facilities, Military and Police applications.
